# Daily Progress Report – [April,23,26]

---

## Mary N. Damsa

**Summary:**

This report covers the sourcing of government office information and initial outreach activities carried out for institutional engagement.

Government offices relevant to the organizational objective were researched and identified using credible sources to ensure accuracy and reliability.

Physical addresses of the selected institutions were compiled and verified where possible. Key institutional heads were also identified and documented to support proper addressing in formal communication.

Official email contacts were collected, prioritizing verified and active channels. Based on this compiled data, 20 formal emails were drafted and sent to the respective government offices, clearly stating the purpose of engagement in a professional tone.

---

**Deliverables:**

- Identified relevant government offices
- Compiled and verified office addresses
- Documented institutional heads and positions
- Collected official email contacts
- Sent 20 formal outreach emails
- Developed structured institutional contact database

---

**Remarks / Challenges:**

- Some institutions had limited or outdated publicly available information
- Certain email addresses required additional verification due to lack of official updates

---

# Favour Johnson

**Summary:**
Favour handled administrative and coordination tasks across invoicing, application processing, and business selection activities.

Invoices were generated for all debtors in the first batch, and each individual was contacted directly with their invoice and payment instructions. Follow-ups were also carried out to ensure clarity and encourage timely payment.

Mr. Arabi's application was reviewed, completed, and verified before submission to ensure all required information was accurate and properly documented.

In preparation for the factory visit, five suitable business options were identified and shared with participants for selection. A categorized summary list of companies was also created based on participants' preferred business types, ensuring alignment and easy reference.

---

**Deliverables:**

- Generated and sent invoices to first batch of debtors
- Conducted follow-ups for payment clarification and action
- Completed and verified Mr. Arabi's application
- Compiled five business options for factory visit
- Created categorized summary list of companies by business type

---

**Remarks:**

- All assigned tasks completed and shared with relevant stakeholders

---

# Noah Ojile

**Summary:**
Implemented RRP integration on the XEM website, covering UI updates, dedicated page creation, and automated signup form notifications.

Today, I implemented key updates to support the RRP (Registered Resource Program) integration on the main XEM website.

On the frontend, I added an RRP carousel item with navigation to dedicated RRP pages, and created a standalone page accessible via `xemgroup.net/rrp`.

On the backend, I built and configured a signup form connected to GPC and XCOS emails, enabling automatic notifications when new organizations register. This supports ongoing integration of XEM Consultants' programs.

---

**Deliverables:**

- Added RRP carousel item to main website
- Implemented navigation buttons linking to RRP pages
- Created dedicated RRP page ( `/rrp` )
- Built and connected signup form to GPC and XCOS emails
- Enabled automated email notifications for new RRP signups

---

**Remarks / Pending Issues:**

- Unable to structure the “View Programs” section due to inaccessible reference links provided by MD
- NPS website video updates pending — required videos are not yet uploaded to YouTube, so embedding is currently not possible
