

Content Calendar — Week of Mon 18 May 2026

Week theme

Foundation week — anchor the *founder voice*, open the *Three Dimensions of Retirement Transition* educational arc, and run the *first speaker tease* → *first full reveal* to start building anticipation.

Hero posts (the three that get the full multi-platform treatment)

- 1. **Founder voice drop** — Eugenia's anchor video clip "What if retirement is your next big break?" (Mon)
- 2. **Three Dimensions of Retirement Transition** mini-series — Financial (Tue), Identity (Thu), Relational (Sun)
- 3. **Speaker #1** — silhouette tease (Wed) → full reveal (Fri)

Cross-coordination locked Monday standup

- **Leo:** 3 briefs (silhouette tease graphic · speaker reveal carousel + headshot composite · 3-dimensions carousel master template). All briefs in §Briefs below.
- **Juan:** 3 WhatsApp broadcasts (Mon — founder · Thu — identity prompt · Fri — speaker reveal). Send him the copy by 10 AM the day before.
- **Mary:** must confirm Speaker #1 name + bio + headshot by **EOD Tue 19 May** so the Fri reveal lands.
- **Favour:** no China-programme posts this week — NPS foundation sprint only. Doing Business in China kicks back in next week.

- ☒ Numbered dimension (1/3, 2/3, 3/3) in top-right corner of slide 1 for series recognition

Mood / tone: Mature · grounded · reflective (not corporate-stock). **References:** Headspace's educational carousels; McKinsey Insights infographic style toned warmer. **Constraints:** brand colours and fonts as above. Slide 1 must be readable as a thumbnail in the IG grid.

Phase 1 success-metric check-in (run during Friday report)

- Total impressions across platforms — on track to 50,000+ by end-May?
- Follower growth — 10–15% increase logged for the week?
- Engagement rate — LinkedIn 3–5%? Instagram 1–2%?
- Cumulative registrations — at least 10 by end of this week (halfway to the 20 end-May target)?

If any one of those is off-pace by Friday 22 May, the answer next Monday is to **double the speaker-reveal cadence** (move from one speaker/week to two) — that's the highest-leverage adjustment available in Phase 1.
